

Clear View 1/4" Seam Foot

9mm max. stitch width models

For the most control over fabric while piecing, most quilters prefer to use the Straight Stitch Needle Plate. Now, there is a 1/4" foot designed specifically for the Straight Stitch Needle Plate! The small single hole in both the plate and the foot ensures optimal straight stitch quality and perfect 1/4" seams.

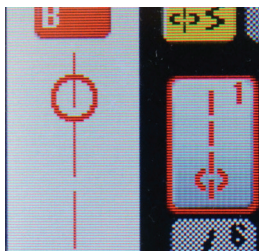

Using a Center Needle Drop

In order to guarantee the perfect 1/4" seam, your 9mm stitch width machine needs to be equipped with the Straight Stitch Needle Plate and be set to the center needle drop position.

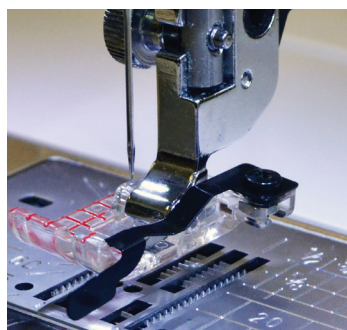

CHANGE YOUR NEEDLE PLATE BY REMOVING THE STORAGE BIN AND PUSHING THE ONE TOUCH NEEDLE PLATE CONVERSION LEVER ON THE FRONT OF THE FREE ARM.

SELECT THE CENTER NEEDLE DROP POSITION FOR THE STRAIGHT STITCH. (ONLY STRAIGHT STITCH OPTIONS WILL BE AVAILABLE ONCE YOU HAVE THE STRAIGHT STITCH NEEDLE PLATE ON.)

LINE UP OUR FABRIC WITH THE SIDE OF THE FLANGE FOR A PERFECT 1/4" SEAM .

ACHIEVING A SCANT 1/4"

- WITH THE STRAIGHT STITCH NEEDLE PLATE YOU CAN MOVE THE NEEDLE OVER ONE OR TWO SPOTS TO THE RIGHT TO ACHIEVE A SCANT 1/4", BUT BE VERY CAREFUL THAT THE NEEDLE CLEARS THE HOLES ON THE PLATE AND THE FOOT.

Part Number - 202-216-003
Fits all 9mm models

Must be used with the Straight Stitch Needle Plate and the Center Needle Position Straight Stitch
